

VASU YADAV

+91 96527 79531 | kaku.vyakunta.v.yadav@accenture.com | Hyderabad, India

ServiceNow Developer with 2.5 years of experience building and supporting ITSM workflows (Incident, Problem, Change, Request), CMDB and CSDM data quality, Service Catalog, and scoped applications on the Now Platform. Certified System Administrator (CSA) and Certified Application Developer (CAD).

EXPERIENCE

Accenture

[Mon YYYY] – Present

ServiceNow Developer — Packaged App Development Associate

Hyderabad, India

- Built and enhanced **Service Catalog Items, Record Producers, and Variable Sets** with reference qualifiers, client-side validation, and approval routing to replace email-based intake with SLA-tracked records.
- Automated incident assignment, escalation, approvals, and notifications using **Flow Designer, Subflows, Business Rules, and Assignment Rules**.
- Developed reusable **Script Includes, GlideAjax, UI Actions, Client Scripts, and UI Policies** to automate validations and reduce duplicate logic.
- Supported REST integrations between ServiceNow and external tools using **REST Messages, Scripted REST APIs, OAuth 2.0, JSON payloads, and error handling**.
- Configured **Import Sets, Transform Maps, coalesce fields, and transform scripts** to load external data and prevent duplicate record creation.
- Maintained **CMDB data quality** by remediating duplicate and stale CIs, updating **identification and reconciliation (IRE) rules**, and validating **Discovery** results through MID Server and ECC Queue logs.
- Configured **CI classes, attributes, and relationships** in CI Class Manager and supported **CSDM alignment** for business applications and application services.
- Implemented **ACLs, roles, groups, and user criteria** across ITSM and scoped application tables, and validated access through impersonation testing.
- Improved script performance using **encoded queries, GlideAggregate, and record limits** in place of nested GlideRecord loops.
- Built **ATF test suites** and managed deployments through **Update Sets**, peer code review, unit testing, and post-deployment validation.
- Created **reports, dashboards, and Performance Analytics views** for incident trends, SLA performance, request volumes, and CMDB health.
- Troubleshoot production defects using **System Logs, Debug Business Rule, Script Debugger, and REST API Explorer**, and delivered enhancements in **Agile sprints** with business analysts and process owners.

CERTIFICATIONS

ServiceNow Certified System Administrator (CSA) — ServiceNow

ServiceNow Certified Application Developer (CAD) — ServiceNow

Microsoft Azure Fundamentals (AZ-900) — Microsoft

EDUCATION

Osmania University

Hyderabad, India

Bachelor of Science (B.Sc.)

GPA: 8.8

TECHNICAL SKILLS

ServiceNow Platform: ITSM (Incident, Problem, Change, Request), CMDB, CSDM, Service Catalog, Knowledge Management, Discovery, Service Mapping, Virtual Agent

Development: Business Rules, Client Scripts, UI Policies, UI Actions, Script Includes, ACLs, Scoped Applications, Update Sets, GlideRecord, GlideAjax, GlideSystem, JavaScript

Integration & Automation: Flow Designer, Subflows, IntegrationHub, Spokes, REST API, Scripted REST API, MID Server, ATF, Import Sets, Transform Maps

Tools & Reporting: ServiceNow Studio, Personal Developer Instance (PDI), Git, Azure DevOps, JIRA, Performance Analytics, Reports and Dashboards
